GauchosNotes

Yanwen Chen

Inspiration

In the passage "As We May Think," Vannevar Bush analysis that "science may implement the e ways in which man produces, stores, and consults the e record of the e race."

Compared to 1945, the combination of art, technology, and science right now is much more powerful.

With the "e ways" today, we can easily learn from each other and make a great improvement!

The Concept

NOTE

As a UCSB student, it would be great for us to all have a notes sharing platform. With clear notes from outstanding students who took the classes before (at least got an A-), one will be able to have a better understanding on the knowledge.
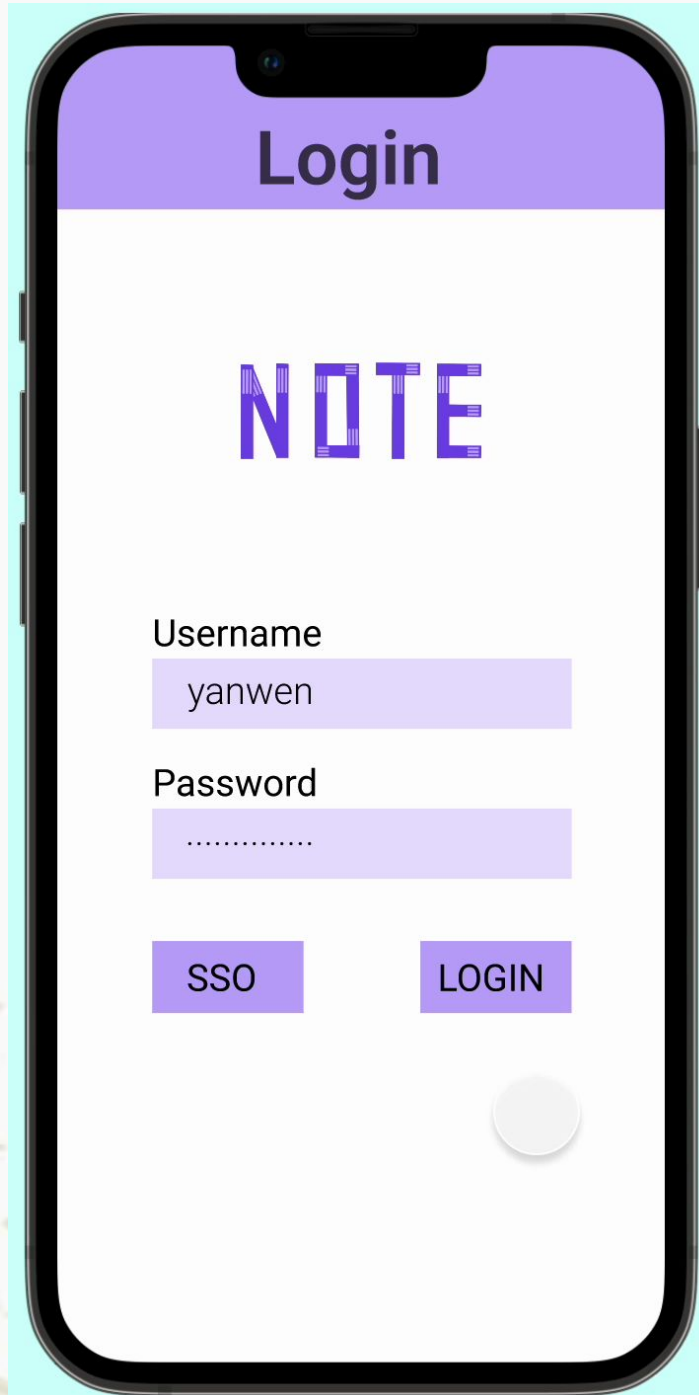

The Concept

NOTE

Thus, I would like to design an app as this platform.

The logo explanation: It is a word "Note" if we look at it from a long distance. While if we notice it closely, it would be the connection of 13 Stroke Towers.

The Video

Details

In the login page, users can choose to use the ucsb sso or the normal account.

When users click the "sso" button, they would see the ucsb sso page.

After inputting the username and password, users can clike the "login" button.

Main

Last View

Search

Upload

Details
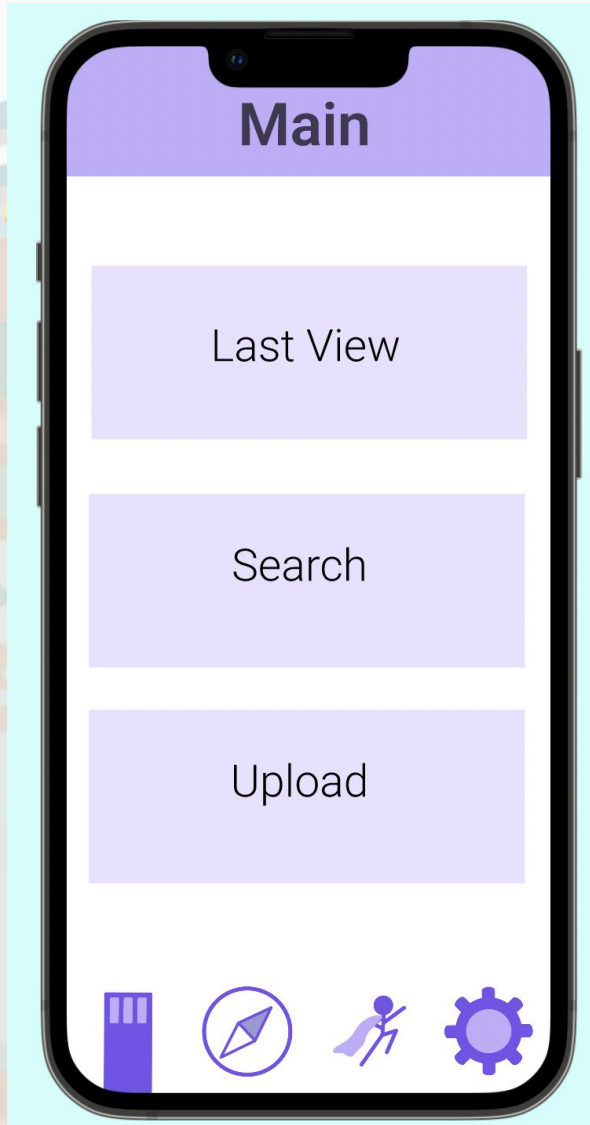

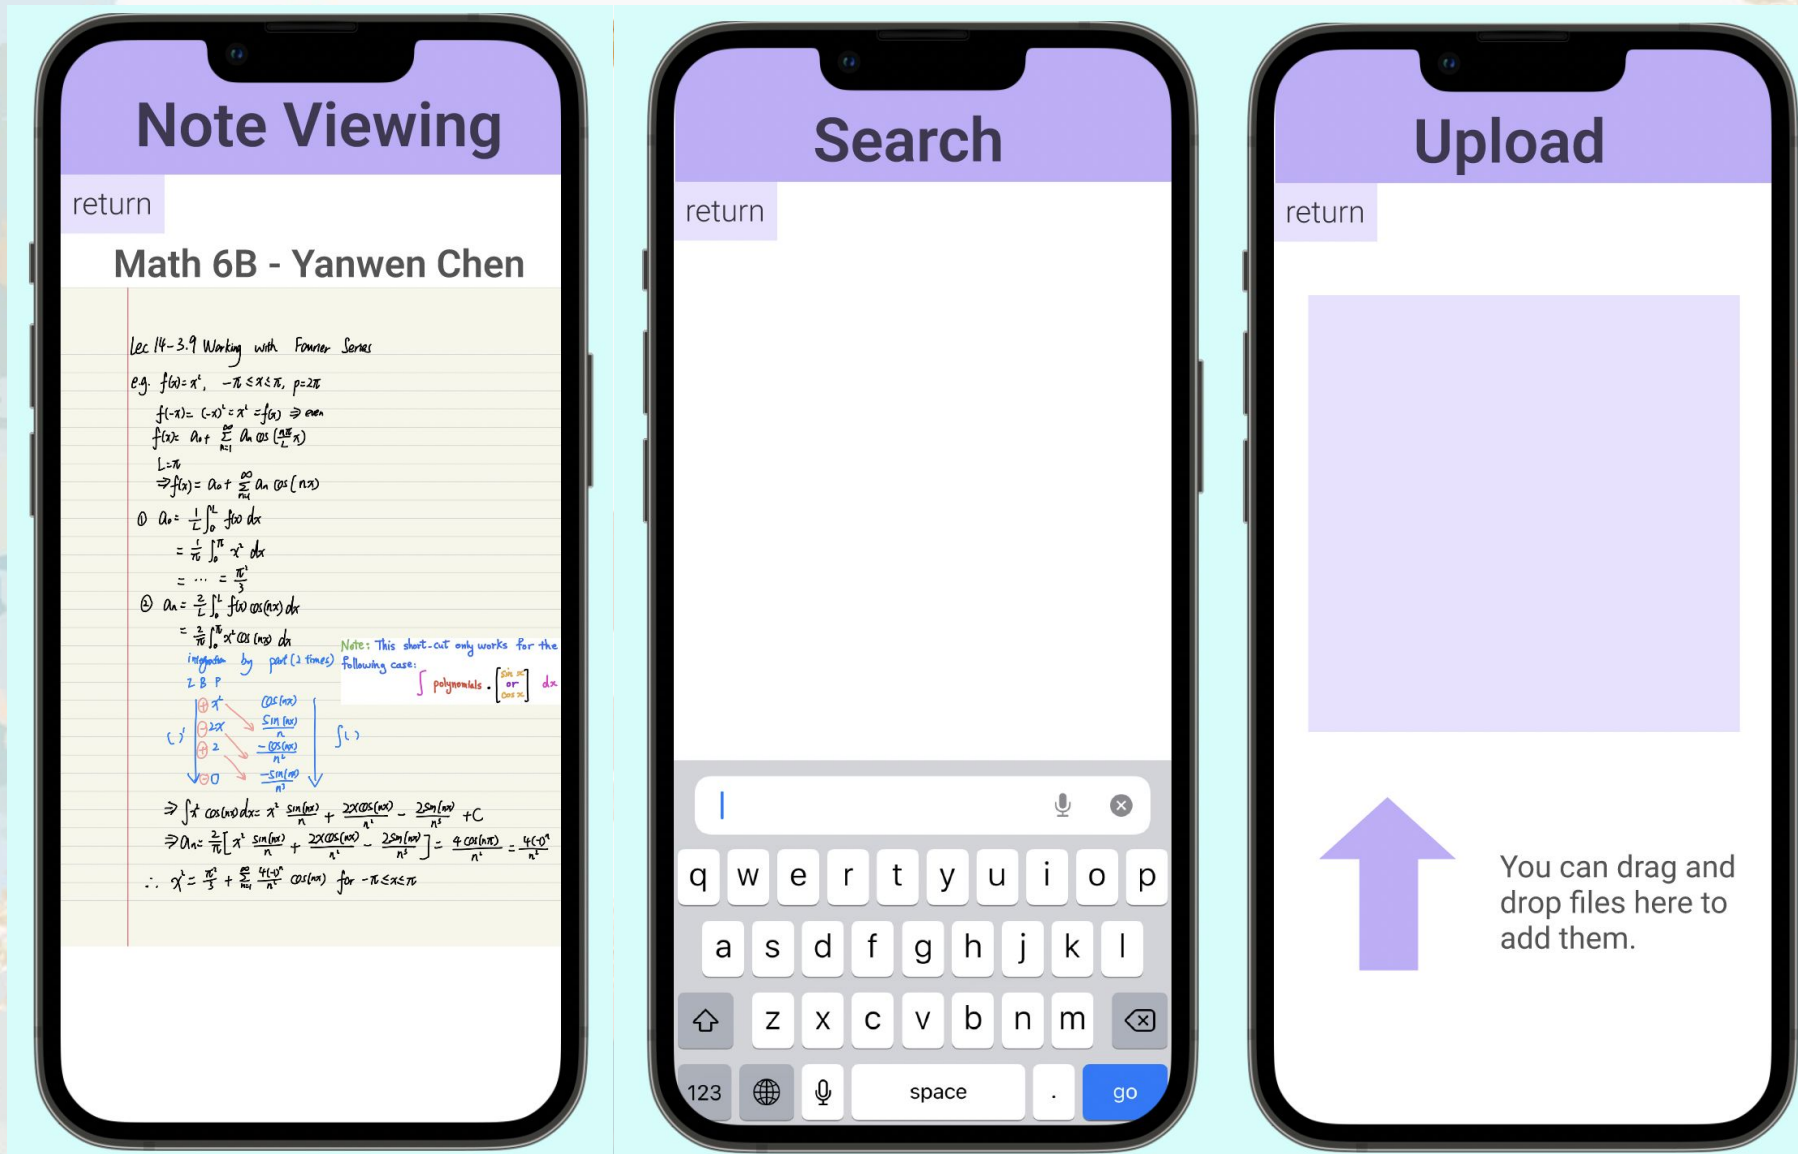

After login, the main page would be seen at first.

In the bottom, we can see there are four icons, which are "Main Page   "Discover Page   "Profile Page   " and "Setting Page   seperately.

Cliking to different buttons(images) will guide users to different pages.

In the main page, there are three sections: "Last View," "Search," and "Upload," which we will talk in the following slide.

Search

return

Upload

return

You can drag and drop files here to add them.

Clicking "Last View" on the main page, users will see the latest note they were viewing, as the image shown.
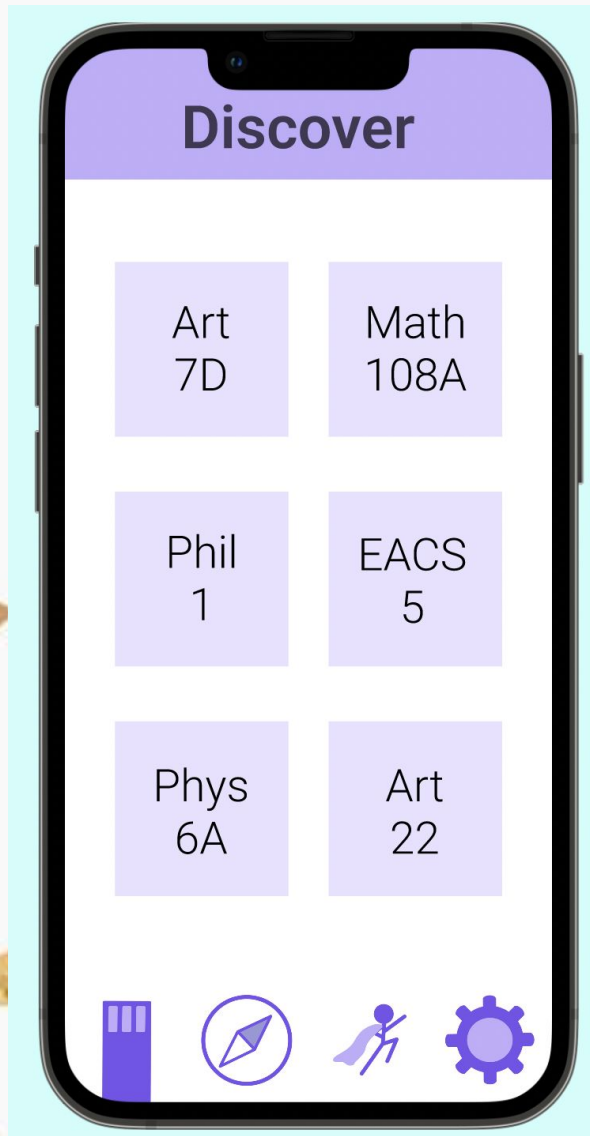

Clicking "Search," users can search for all the notes they need.

Clicking "Upload," users can share their notes. (Inspired by Gauchospace from UCSB.)

Clicking "return" on either page here, users will go back to the main page.
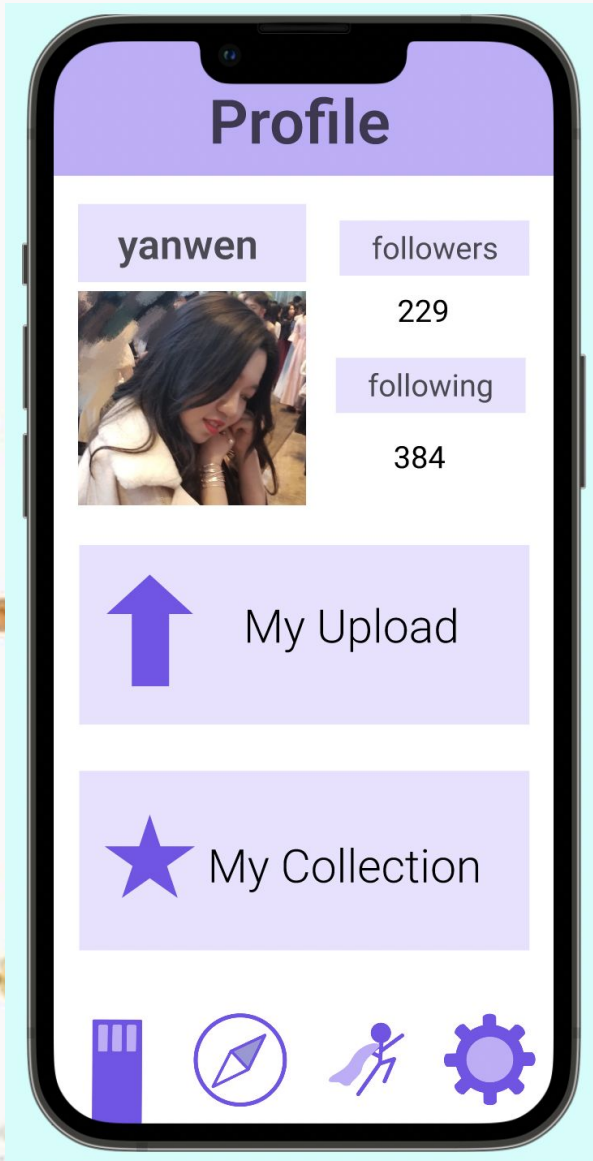

Details

Discover

Art 7D	Math 108A
Phil 1	EACS 5
Phys 6A	Art 22

Clicking the discover button users will see the discover page.

On this page, we can see the popular notes or high rating notes recently.

Details

Clicking the profile botton users will see their profile page.

In the profile page, there are the user name, user image, the number of user's followers, and number of user's following friends. (Inspired by Instagram from app store.)

In addition, user can reach their upload notes or collection notes easily.
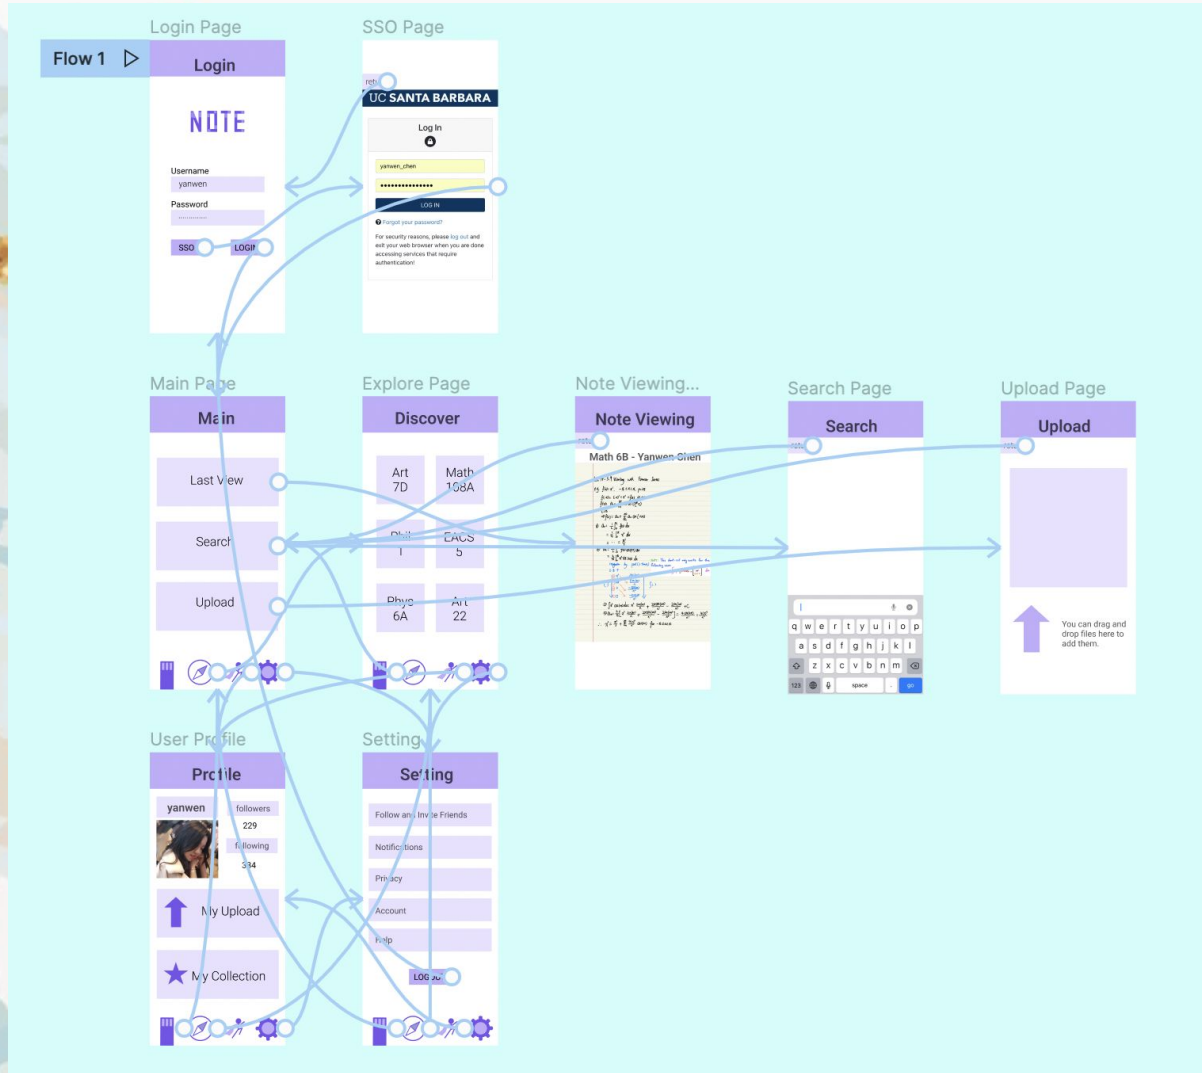

Details
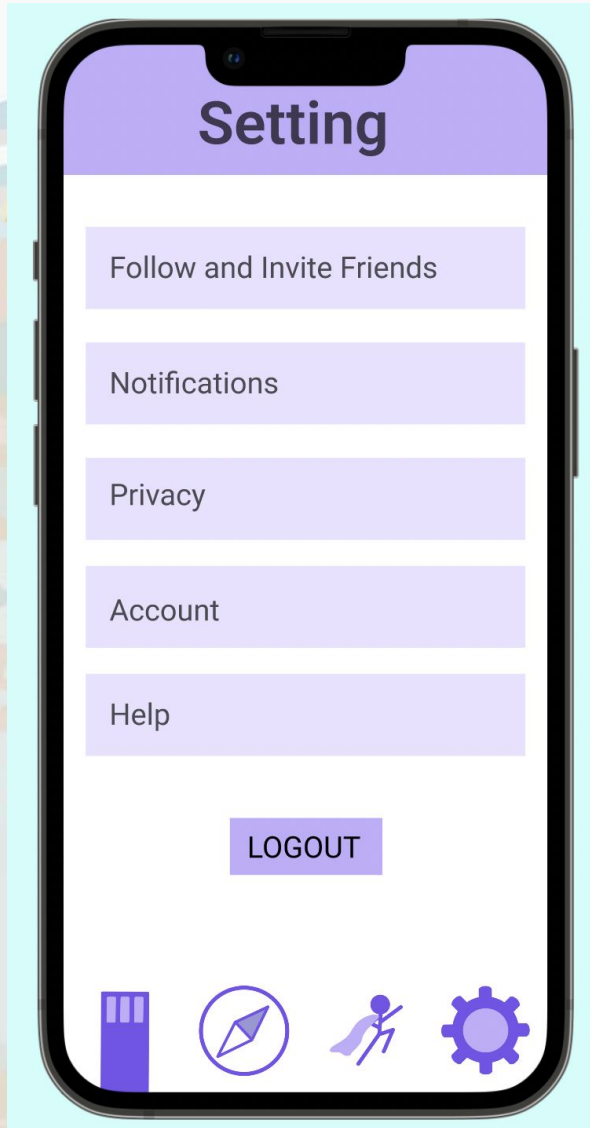

Clicking the setting botton ⚙
users will see the setting page.

In the setting page, people can see the sections "Follow and Invite Friends," "Notifications," "Privacy," "Account," and "Help." (Inspired by Instagram from app store.)

Also, users can easily logout by clicking the button "logout," and then they will be guide to the original login page.

Conclusion

With the GauchosNotes app, we gauchos can learn from our outstanding peers and do an excellent jobs.

GauchosNotes is a note-sharing platform prototype. This framework may be used not only at UCSB, but also at any other university, potentially benefiting millions of college students!
